

# Required Data on Usage Item

- **Usage key:** A unique key that will map the usage (or multiple keys), this basically decides where the usage is going
- **Quantity:** How much usage it is
- **From date:** The date the usage was used, or the first date of the period it was used (for example 2019-07-01 for July 2019)
- **Unit code:** What the usage quantity is, for example, hours

usagekey	Quantity	From Date	Unit code
erikscars	7000	2020-11-01	msg

# Data Structure

# Usage Mapping

## 1. Account

- Key Example: Account Number (A-000001)

## 2. Order

- Key Example: Order Number (O-000005)

## 3. Product

- Key Example: Product Name (Platform)
  - Product id

## 4. Charge

- Key Example: Charge Number (OPC-000146) → Younium Specific
- Or Custom field: Your system's specific data → Usagekey

# Post Usage Request Example (order as key)

[POST] <https://younium-api-sandbox.azurewebsites.net/v1/usage>

```
{  
  "fromDate": "2021-08-01",  
  "description": "Usage description",  
  "quantity": "100",  
  "source": "Source where the usage was produced",  
  "order": {  
    "key": "extraid",  
    "extraid": "kebab"  
  },  
  "unit": {  
    "key": "unit",  
    "unit": "pcs"  
  }  
}
```
